

# Innovation & solution provider in mobile automation & products

You get an experienced and effective technical team  
and shorter time-to-market – and added product values

## Partnership with mobile & technical insight

Shorter time-to-market and integration of new cutting edge technologies - at a competitive level of costs – are some of the challenges in the global market of mobile products.

This is only possible by creating close and effective partnerships because the field of mobile automation is demanding and you need a lot of different competencies in order to compete in technology and unit costs.

We can provide you with a professional partnership in technical innovation and business growth.

# Consulting & development team specialized in mobile solutions

Thorough technical know-how and year-long experience in project development and in agile project management

Our consulting and development team has a **very thorough know-how and experience in creating innovative technical solutions** in the field of both industrial products, special machinery and control systems - e.g. for agricultural equipment and other mobile vehicles.

The team has **many years of experience of solving product development tasks** for small and large scale companies. The solutions are innovative, cost-effective and robust and include system controllers, special units and integration of cutting-edge technologies in industrial and mobile environments.

We have developed a wide range of **tailor-made products** - specialized electro-mechanical units, motor controllers, real-time S/W, electronics etc. This includes project management, product development and planning of cost-effective production & logistics.

In addition we are experienced in **mobile networks & server solutions** – e.g. remote monitoring and mobile and wireless data transfer. This include a comprehensive experience in **Cloud and IoT implementations**. And all of this is supported by an effective, agile and iterative approach to product development & project management.
